Web Announcement 1888

Nevada Medicaid Human Papillomavirus (HPV) Vaccine Policy Effective May 6, 2019

Effective May 6, 2019, Nevada Medicaid will expand the coverage of eligible recipients for the Human Papillomavirus (HPV) vaccine to include ages 9 through 45 years based on updated indications from the Food and Drug Administration (FDA).

For recipients over the age of 18 years, pharmacies will be reimbursed the cost of the medication in addition to a \$7.80 administration fee. For recipients age 18 and younger, only the administration fee is paid. For additional information on outpatient prescription drug billing, visit the Nevada Medicaid and Nevada Check Up Pharmacy Manual at https://www.medicaid.nv.gov/Downloads/provider/NV_Pharmacy_Manual.pdf. Pharmacies may obtain this medication at no charge through the Nevada Vaccines for Children (VFC) Program. For additional information on VFC patient eligibility, visit the Nevada Division of Public and Behavioral Health VFC Program website at <http://dpbh.nv.gov/Programs/VFC/VFC - Home/>.
